**Tools & Software:** React.js, Next.js, Angular, Tailwind CSS, Oracle DB, Microsoft Azure, Jira, Microsoft Excel
**Programming Languages:** JavaScript, Python, SQL, PL/SQL, C, C++
**Tools & Concepts:** Git, GitHub, Software Development Life Cycle, OOP, Agile Methodology
**Core Competencies:** Strategic Planning, Data Analytics, Product Management

## EXPERIENCE

**Jr Software Engineering Co-op**          **MCCSS (Ontario Ministry)**          **May 2024 – Dec 2024**
- Developed a calculator tool adopted by the QA team, making workflows 2x faster.
- Designed detailed test plans and tracked hundreds of defects in Azure DevOps.
- Collaborated with cross-functional teams to develop and test software.

## PROJECTS

**Personal Portfolio Website**          https://www.intaechung.com/
- Built a fully responsive website using Next.js for efficient server-side rendering
- Leveraged Tailwind CSS and Framer Motion to enhance component clarity and interactivity.
- Improved page navigation for smoother user flow and easier access to key sections.
- Integrated Resend API to handle contact for submissions and deliver real-time notifications.

**Art Collection Website**          https://art-app-seven.vercel.app/
- Implemented MoMA's Rest API to manage interactive art collections.
- Built a dynamic website using Next.js and Bootstrap CSS for product management.
- Secured user accounts with encrypted passwords before storing in MongoDB.
